

ESET NOD32 Antivirus 4 Business Edition + Remote Administrator

The latest generation of ESET’s Internet security for businesses

ESET NOD32® provides proactive protection against increasingly sophisticated and targeted cyber threats. Known for being fast and unobtrusive, it allows you to focus on your business, not your antivirus. ESET NOD32 Antivirus uses advanced heuristics that provide the best proactive detection against today’s ever-changing threats, before other software is able to detect them. But don’t take our word for it — ESET has consistently received the highest marks in proactive protection tests conducted by AV-comparatives.org, and received the highest ranking on *Forbes’* list of best-in-class antivirus products.

Endpoint security management made easy

Ease of management is as critical as the effectiveness of your endpoint security solution. ESET Remote Administrator 4 provides a comprehensive management console so you can control your entire network from one place — whether you support ten computers or thousands. Installation, updates, alerts, reports and other tasks are all easily managed from intuitive screens. ESET Remote Administrator has a small footprint and is highly scalable. It makes managing our security solutions simple for businesses of all sizes.

KEY FEATURES — ESET NOD32 ANTIVIRUS 4

Smart detection	ESET NOD32 Antivirus uses proactive detection technology to identify malware, providing your system with around-the-clock protection. Proactive detection relies on advanced heuristics as well as generic and genetic algorithms to detect new malware and new mutations of known malware.
Extremely light system footprint	ESET NOD32 Antivirus is so light, your users will not even notice it's running.
Advanced archive scanning	Threats don't always enter where you expect. ESET NOD32 Antivirus can scan into layers of compressed files to ferret out malicious software. Users can control search depth, file size, archive size and timeout of archive scans.
Encrypted communication control	Scanning SSL-encrypted HTTP and POP3 protocols defeats even threats that hide from plain sight.
Enhanced portable computer support	Enhanced settings for portable computers allow tasks to be postponed when the computer is running on battery power.
ESET SysRescue	Creates rescue CDs, DVDs or USB drives for cleaning unstable or infected systems.
ESET SysInspector® integration	Administrators will love our advanced diagnostic tool for taking "deep-dive" snapshots of systems. Files and processes are color coded in scan logs to make it easy for IT admins to identify potential threats in the system.
Uninstall password protection	Password protection prevents ESET NOD32 Antivirus from being uninstalled by unauthorized employees or visitors.
ESET self-defense and HIPS	ESET NOD32 Antivirus has built-in technology to prevent malicious software from corrupting or disabling it. Unauthorized attempts to modify your OS or applications are actively blocked through a combination of advanced behavioral analysis and network filtering that monitors your system processes, files and registry keys.
Removable media access control	Protects against infections from USB drives, floppies, CDs and DVDs.
Improved cleaning	Cleaning of certain difficult-to-remove infections has been significantly improved.
Support for Cisco Network Admission Control	Regulatory compliance is simplified with native support for Cisco NAC.
Mirror updating	Mirror servers make it easy to manage distribution of signature database updates to all ESET products within the network, saving you valuable time and bandwidth.

KEY FEATURES — ESET REMOTE ADMINISTRATOR

Group management	Avoid unregistered clients by synchronizing group structure with Active Directory. Simplify filtering and reporting processes and build notification and policy rules with static or parametric groups. Parametric groups update dynamically to include clients that meet specified conditions, taking the work out of searching for endpoints that require attention.
Simplified remote installation	Close security gaps and free your IT staff from tedium with improved searching for unregistered clients and create tasks to push install clients in parallel without human intervention.
Centralized quarantine management	Restore or delete quarantined objects from the console based on specified criteria or exclude them from further scanning. Having top-down visibility ensures consistency in quarantine policy across all endpoints.
Policy management	Define and enforce policies consistently throughout your network. Policy Manager makes it easy to import/export, apply, inherit and merge policies in a variety of ways. Time-saving replication policies allow multiple ESET Remote Administrator servers to synchronize efficiently in wide area network deployments.
Cross platform management	Remotely manage from a single console all endpoints running current and previous versions of ESET Smart Security and ESET NOD32 Antivirus for Windows, as well as upcoming releases of ESET NOD32 Antivirus 4 for Mac and Linux and next-generation mobile security products.
Notification management	Notifications are highly customizable and allow for monitoring of a broad range of incidents (status of clients, possible virus outbreak or network attack, new client event, finished task, license expiration or server errors and warnings). Notification actions include email, SNMP Trap, launch on server and log entry.

SYSTEM REQUIREMENTS

ESET Remote Administrator Console

32-bit operating systems	Windows NT4 SP6 and later
64-bit operating systems	Windows XP and later
Databases	Microsoft Access (built-in), MySQL 5.0, ORACLE 9i, MSSQL 2005
Windows installer	2.0

ESET Remote Administrator Server

Operating systems	Microsoft Windows NT4 SP6*, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2003, Microsoft Windows 2008 *Windows NT4 — Access Components (MDAC) 2.5 Service Pack 3 must be installed
Example requirements	ESET Remote Administrator has minimal system requirements. For example, ESET Remote Administrator Server installed on a Microsoft Windows Server 2003 administering 500 clients only requires: 1 GHz processor, 1 GB RAM, 2 GB free disk space, 100 Mbps network adapter

ESET NOD32 Antivirus 4 — Business Edition

Processors supported	Intel or AMD x86 / x64
Operating systems	Microsoft Windows NT4 SP6*, Microsoft Windows 2000, Microsoft Windows XP, Microsoft Windows Vista, Microsoft Windows 7, Microsoft Windows Server 2000, Microsoft Windows Server 2003, Microsoft Windows Server 2008
Memory	44 MB
Disk space	28 MB (download) / 35 MB (installation)

* NOTE: Available with version 4.2 or later. Features not supported in NT are self-defense, removable media access control, SysInspector, SysRescue and enhanced portable PC support.
