Unified Threat Management Solutions

Blended Security Threats Within Small Businesses and Enterprises

Cyber crime and network attacks pose serious threats to small businesses. Intellectual property, revenue, customer and company records, and other mission critical resources are at risk. As larger companies work to increasingly lock down their networks, more and more security threats are being targeted at smaller companies. Small office/home offices (SOHO) often lack the infrastructure to meet the technical sophistication of today's complex blended-attack methods and remote offices/branch offices (ROBO) often lack the on-site expertise to tackle such complex security issues. Point-based security appliances are inadequately equipped to protect against these types of attacks because of the multitude of attack vectors used. The Fortinet FortiGate series of SOHO and ROBO security appliances tightly integrate multi-threat protection onto a purpose-built platform to effectively block application- and network-borne attacks.

Cost-Effective Security Platform

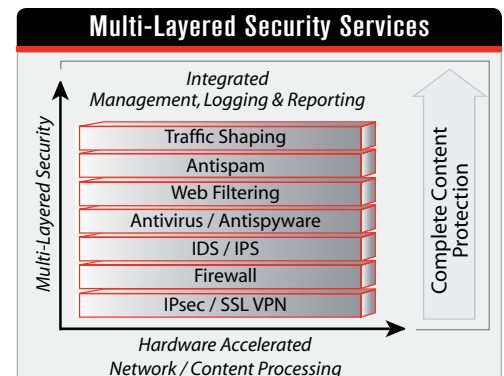

The Fortinet FortiGate series of security appliances deliver high performance, multi-threat protection at a compelling cost that is ideal for securing smaller locations. Complete Unified Threat Management (UTM) features including firewall, VPN, intrusion prevention, Web filtering, antispam, antivirus, antispyware, traffic shaping and IM/P2P controls prevent blended attacks or unauthorized use from interrupting business. All FortiGate devices support High Availability (HA) configurations to ensure maximum uptime. FortiGate appliances operate in either transparent or routing modes and are available with integrated multi-port switches and modems, integrated WiFi access points and PC Card slots for 3G/UMTS modems, all of which enable FortiGate devices to adapt to any network environment. Moreover, with Fortinet FortiGuard Security Subscription Services, the FortiGate-50 thru -100 Series become an affordable and easy-to-manage security solution for an enterprise's remote/branch offices, a service provider's customer premise equipment (CPE) or as an all-in-one solution for small-to-medium businesses.

Key Problems	Solutions
<ul style="list-style-type: none"> Small Offices and Home Offices (SOHO) are particularly vulnerable to cyber attacks due to the lack of resources and budgets to combat complex network and content based threats 	All-in-one Unified Threat Management (UTM) system provides multi-layer threat protection with automatic updates all in a cost-effective package
<ul style="list-style-type: none"> Deploying multiple point-products from different vendors does not provide integrated protection from blended threats and is costly to own and complex to maintain 	UTM security solutions provide tightly integrated protection services with a unified management, logging and reporting interface
<ul style="list-style-type: none"> Adoption of WiFi wireless technology opens another window for attack from inside of the network 	Built-in WiFi wireless ensures the same level of protection across both wired and wireless networks
<ul style="list-style-type: none"> SOX and PCI compliance requirements adds a new dimension of complexity to logging and reporting 	Unified tools with a common user interface simplify analyzing, reporting and managing compliance

Fortinet's Multi-Layered Security Solution

Fortinet's multi-layered security solutions efficiently and economically provide an integrated set of security services in a single, easy-to-manage high-performance appliance that is capable of supporting a wide range of deployment scenarios. In addition, FortiGuard Subscription Services include everything from technical support, antivirus updates, antispyware, antispam, and Web content filtering to ensure that your security environment remains current and your corporate resources are protected against the latest blended threats. FortiGate systems come with a one-year limited hardware warranty and 90-day limited software warranty.

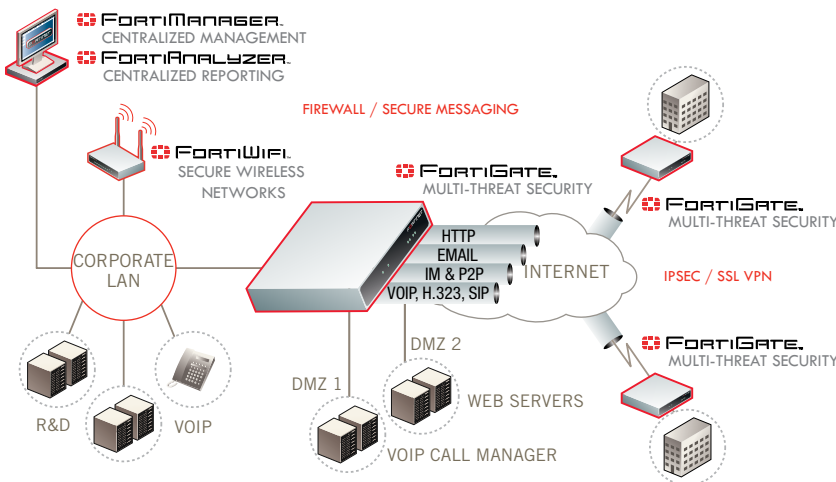

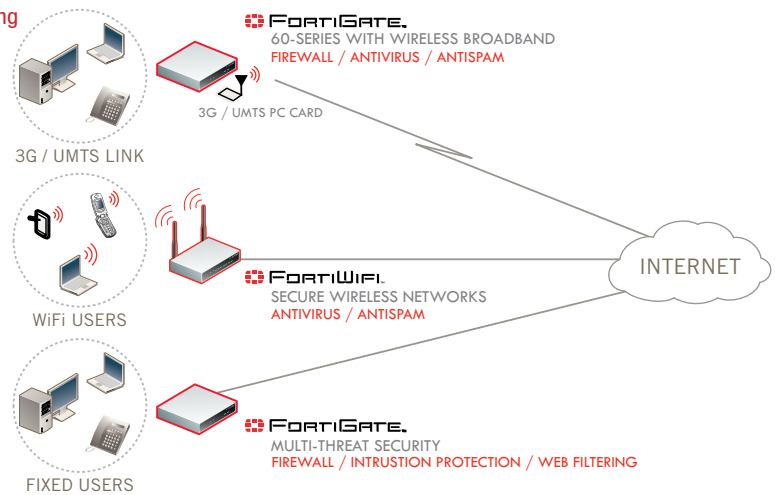

FortiGate 50-100 series appliances are designed to secure small size offices and businesses.

Secure Wired and Wireless Gateways for Small Business

Firewall + Antivirus + Antispam + Intrusion Prevention + Web Filtering

Through the integration of essential security technologies, Fortinet protects both mobile workers and workstations at SOHO and ROBO locations. To keep resources safe, Fortinet's advanced antivirus, antispam, and intrusion prevention systems utilize the integrated FortiASIC processor and a combination of signature and heuristic detection engines to provide multi-layered, real-time protection against a multitude of attacks. The FortiWifi series offers the ability to broadcast multiple SSIDs (Service Set Identifiers), maximizing infrastructure flexibility in multi-provider environments and conserving spectrum. Moreover, different security policies can be set for each SSID, increasing security flexibility. FortiGate 60-series models provide a PC card slot that allows a 3G/UMTS PC card to be used for secure network connectivity.

Enterprise ROBO Deployment

Firewall + VPN + Secure Messaging (Email, IM and P2P)

Workers at various remote offices are tasked with vastly different business processes: some use messaging applications while others use database applications. Sales offices that use email and IM applications are protected from blended threats that use multiple methods to attack a system: viruses that spawn dormant Trojans, rootkits, and bots, for example. Combining Fortinet's antivirus and antispam technology with IM and P2P controls, employees are assured that email and IM messaging remain secure and won't result in lost revenue or lost data. Application and database users, such as a remote manufacturing site, are guaranteed secure connectivity—via firewalls and VPNs—to the application servers it uses at the central office. Finally, Fortinet offers a complete management solution for centralized monitoring, reporting, logging, and analysis to ensure that remote offices remain up and running.

Managed Security Service Provider Deployment

Firewall + Antivirus + Intrusion Prevention + Web Filtering

Managed Security Service Providers (MSSPs) can distribute FortiGate appliances throughout their Customer Premise Equipment (CPE) deployments because of the wide array of connectivity options and the modular security architecture. Different customers can be protected in different ways, according to their needs. For example, one set of customers can be protected with a firewall and intrusion prevention system, while another can be protected with a firewall and web content filtering. MSSPs can centrally monitor and manage all customers using FortiManager and FortiAnalyzer for end-to-end reporting, logging, and even forensic analysis of security events.

Technical Specifications

HARDWARE SPECIFICATIONS	FortiGate-50B	FortiWiFi-50B	FortiGate-60B	FortiWiFi-60B	FortiGate-100A
LAN Switching Interfaces	3	3	6	6	4
WAN Interfaces	2	2	2	2	2
DMZ Interfaces			1	1	2
Analog Modem			Yes	Yes	
Wireless LAN

Fortinet Unified Security Solutions

- All-inclusive, cost-effective security solution**
 Fortinet offers a lower total cost of ownership with the most complete set of functions including: antivirus, intrusion prevention, antispam, web content filtering, and antispam
- Automated updates of antivirus/antispam and IPS security content**
 Around-the-clock protection against the latest threats. Virus and intrusion encyclopedia covers more than 60,000 different threats
- High performance custom hardware**
 The Fortinet FortiASIC delivers superior performance and reliability, ensuring that the security appliance does not become a network bottleneck
- Integrated multi-port switch**
 Eliminates the need for external switches and provides enhanced connectivity options
- Secure Web UI for easy deployment and management**
 Quick and easy configuration wizard walks administrators through initial setup and graphical user interface offers at-a-glance security event and performance monitoring
- Security hardened custom Operating System (OS)**
 Underlying FortiOS™ is ICSA Labs-certified and offers a comprehensive command-line interface

Fortinet's ASIC-Based Advantage

FortiASIC is the foundation of Fortinet's unique hardware technology. FortiASIC is a family of purpose built, high-performance network and content processors that uses an intelligent proprietary content scanning engine and multiple algorithms to accelerate compute-intensive security services. FortiASIC provides the performance required to deliver enterprise and carriers-class UTM services. Coupled with the FortiOS security hardened Operating System, FortiASIC delivers extreme performance and security.

FortiOS: Developed for Security

FortiOS is the software foundation of FortiGate multi-threat security platforms. Developed solely for security, performance and reliability, it is a purpose-built operating system that leverages power of the the FortiASIC content and network processors. FortiOS enables a comprehensive suite of security services – content inspection firewall, IPS, antivirus, web filtering, antispam, IM/P2P, virtual network security and bandwidth shaping. FortiOS is a complete suite of UTM security services and is certified for Common Criteria EAL 4+.

FortiGate-50-100 Series

FortiGate-50-100-series platforms provide the following security features:

FIREWALL

ICSA Labs Certified (Enterprise Firewall)
NAT, PAT, Transparent (Bridge)
Routing Mode (RIP v1 & v2, OSPF, BGP, & Multicast)
Policy-Based NAT
Virtual Domains (NAT/Transparent mode)
VLAN Tagging (802.1Q)
User Group-Based Authentication
SIP/H.323 NAT Traversal
WINS Support
Customized Protection Profiles

VIRTUAL PRIVATE NETWORK (VPN)

ICSA Labs Certified (IPSec & SSL)
PPTP, IPSec, and SSL
Dedicated Tunnels
DES, 3DES, and AES Encryption Support
SHA-1/MD5 Authentication
PPTP, L2TP, VPN Client Pass Through
Hub and Spoke VPN Support
IKE Certificate Authentication
IPSec NAT Traversal
Dead Peer Detection
RSA SecurID Support

INTRUSION PREVENTION SYSTEM (IPS)

ICSA Labs Certified (NIPS)
Protection From Over 3000 Threats
Protocol Anomaly Support
Custom Signature Support
Automatic Attack Database Update

ANTIVIRUS

ICSA Labs Certified (Gateway Antivirus)
Includes AntiSpyware and Worm Prevention
HTTP/SMTP/POP3/IMAP/FTP/IM and Encrypted VPN Tunnels
Automatic "Push" Virus Database Update
File Quarantine Support
Block by File Size or Type

WEB FILTERING

URL/Keyword/Phrase Block
URL Exempt List
Content Profiles
Blocks Java Applet, Cookies, Active X
FortiGuard Web Filtering Support

ANTISPAM

Real-Time Blacklist/Open Relay Database Server
MIME Header Check
Keyword/Phrase Filtering
IP Address Blacklist/Exempt List
Automatic Real-Time Updates From FortiGuard Network

TRAFFIC SHAPING

Policy-based Traffic Shaping
Differentiated Services (DiffServ) Support
Guarantee/Max/Priority Bandwidth

NETWORKING/ROUTING

Multiple WAN Link Support
PPPoE Support
DHCP Client/Server
Policy-Based Routing
Dynamic Routing (RIP v1 & v2, OSPF, BGP, & Multicast)
Multi-Zone Support with Routing Between Zones
Route Between Virtual LANs (VDOMS)

MANAGEMENT/ADMINISTRATION OPTIONS

Console Interface (RS-232)
WebUI (HTTP/HTTPS) and Command Line Interface
Telnet / Secure Command Shell (SSH)
Role-Based Administration
Multi-language Support
Multiple Administrators and User Levels
Upgrades and Changes Via FTP and WebUI
System Software Rollback
Central Management via FortiManager (optional)

LOGGING/MONITORING

Internal Logging
Log to Remote Syslog/WELF server
Graphical Real-Time and Historical Monitoring
SNMP
Email Notification of Viruses And Attacks
VPN Tunnel Monitor
Optional FortiAnalyzer Logging

USER AUTHENTICATION OPTIONS

Local Database
Windows Active Directory (AD) Integration
External RADIUS/LDAP Integration
IP/MAC Address Binding
Xauth over RADIUS for IPSEC VPN
RSA SecurID Support

VIRTUAL DOMAINS (VDOMS)

Separate Firewall/Routing domains
Separate Administrative domains
Separate VLAN interfaces
10 VDOMS (standard)

HIGH AVAILABILITY (HA)

Active-Active, Active-Passive
Stateful Failover (FW and VPN)
Device Failure Detection and Notification
Link Status Monitor
Link failover

INSTANT MESSENGER /

PEER-TO-PEER ACCESS CONTROL

AOL-IM	Yahoo	MSN
ICQ	Gnutella	BitTorrent
WinNY	Skype	eDonkey
KaZaa		

FortiGuard® Security Subscription Services

With FortiGuard™ Security Subscription services enabled, customers can rest assured that their Fortinet security platforms are performing optimally and protecting their corporate assets with the latest security intelligence. FortiGuard services deliver the latest security content directly to Fortinet products. Fortinet offers four standard subscription services: Antivirus, Intrusion Prevention, Web Filtering and Antispam services to protect against multiple types of new and emerging threats. FortiGuard services are updated by the Fortinet Global Threat Research Team, a team of experts working around the clock and around the world to keep Fortinet customers secure. The Fortinet Global Threat Research Team enables Fortinet to deliver comprehensive multi-threat protection, including zero-day protection from new and emerging threats. The FortiGuard Network is a network of global data centers that automatically deliver updates quickly and reliably to Fortinet products.

For customers requiring guaranteed response time to suspicious malware threats, Fortinet offers a premier version of the FortiGuard Antivirus Security Subscription service. Along with Service Level Agreements (SLAs), the premier service provides the customer with a direct conduit to the Fortinet Global Threat Research Team.

Fortinet also offers a premier version of the FortiGuard Web Filtering Security Subscription service. This higher-tier service offering includes guaranteed SLAs and a larger quota for rating URLs submitted to the Fortinet Global Threat Research Team.

FortiCare Support Services

Includes:

- 24/7/365 FortiCare Web-based support
- 8x5 telephone-based technical support (24x7 - optional)
- 1-Year limited hardware warranty
- Technical account management service available
- Professional services available
- 90-day limited software warranty
